SUMMARY

Experienced Staff Engineer, currently specializing in client-side ad technology, performance optimization, and cross-platform architecture.

- Recognized as a top-performing individual at my level in FY23 and awarded a company-wide performance honor in FY24.
- Leading all client platforms on the supply side while expanding into demand-side and backend contributions.
- 13 years of diverse industry experience in multiple domains and with cross-functional, cross-border teams.
- Passionate about driving high-impact innovations, performance improvements, and operational excellence in large-scale systems.

EXPERIENCE

Staff Software Engineer

Disney+ Hotstar

09/2022 - Present Remote

Leading Ads Client platforms, driving innovation and performance with measurable metrics

- Led projects that fundamentally change how Ad insertion occurs in Live and VoD streams, resulting in lower infrastructure cost and 2x efficiency.
- Built a comprehensive strategy to reduce ad load times, breaking it down into smaller sub-projects. These initiatives resulted in a 50% reduction in ad load times.
- Architected and drove industry-first, innovative ad formats such as 3D Breakout Ads, Vertical Ads, and Video Billboard Ads.
- Enhanced observability of client metrics, uncovering hidden issues and improving debuggability.
- Engaged in cross-platform architecture discussions and technical design reviews across functions.

Founding Android Engineer

DoctorPlan

09/2018 - 09/2022 New Delhi

Responsible for Android platform E2E

- Built the DoctorPlan patient and provider apps from scratch using a modern Android development stack (Kotlin, MVVM, Koin, etc.).
- Led feature design, implementation, and deployment.
- Set up CI/CD pipelines using GitHub Actions and Fastlane.
- Modularized the codebase into over 80 Gradle modules.
- Initiated and completed various refactoring efforts, such as migrating from RxJava2 to Kotlin Coroutines, from Gson to Moshi, and from Synthetics to ViewBinding.

Lead Android Engineer

moldedbits

10/2014 - 08/2018 New Delhi

Oversaw Android development.

- Delivered over ten production-quality Android apps for both enterprise clients and startups.
- Gained hands-on experience with cutting-edge technologies such as RxJava2, Kotlin, Retrofit2, and MVP.
- Worked across domains including IoT, housing, eCommerce, energy, automation, and image processing.

Software Engineer

Samsung R&D Institute

04/2014 - 10/2014 Bengaluru

Worked in the Multimedia Group.

- Developed features for upcoming Samsung phones.
- Conducted feasibility study for new requirements, PoC development.
- Key Tech: Android Framework, GLSL Shaders, OpenGL, C++, Python.

Engineer, Graphics

VizExperts

05/2012 - 04/2014 Bengaluru

Worked as Engineer in Computer Graphics.

- Led large scale desktop application called VizDisplay for defence labs.
- Key Domains: Virtual Reality, Display walls, and Computer Graphics.
- Key Tech: OpenGL, GLSL, Python, C++, Multi-threading, Hardware Interfacing.

RECENT PROJECTS

New Ad Formats- 2023-24

- Engineered various new ad formats—most notably 3D Breakout Ads, Vertical Ads, Interstitial Ads, and Video Billboard Ads.
- Collaborated with ad tech client teams, backend teams, and other stakeholders from concept to go-to-market, ensuring a clear path to success.
- Some of these formats represent the most premium inventory in the D+H app and generate significant revenue.

SGAI- 2023-25

- SGAI is a proprietary, industry-first ad insertion mechanism in live streams that enables highly targeted ads under high concurrency.
- Single-handedly managed the client implementation and architecture, including relevant metrics to ensure ad and player performance.

Ad Load Time Improvement- 2024

- Applied first-principles thinking to identify bottlenecks in the Ad load flow and crafted a comprehensive strategy document.
- Decomposed the strategy into small, actionable projects to drive systematic improvements.
- Ad load times improved by 50% as a result of these efforts, leading to an enhanced user experience.

Observability Improvements

- Proposed relevant metrics and instrumentation that provided valuable insights into errors and latencies.
- Ensured instrumentation parity across all platforms, created dashboards, and defined SOPs for on-call teams.

Past Projects

- For a complete list of past apps and projects, please visit [this link](#). (Or refer blog listed in profile section)

KEY ACHIEVEMENTS

2024- Shooting Star

Company-wide recognition for driving high-impact initiatives and setting new standards.

2023- Top Performer at Level

For driving and architecting innovative ad formats that generated multimillion \$ in revenue.

2017- Outstanding Leader

For excellence in leadership and initiating new projects focused on efficiency at moldedbits.

2014- #1 Worldwide- Worldviz Ideation

International ideation contest organized by Worldviz, a pioneer in large-scale VR systems.

EDUCATION

Bachelor of Technology in Computer Science & Masters of Business in Operations

Jaypee Institute of Information Technology

08/2007 - 07/2012 Noida
